

QCPBars::getValueRange

```
graph LR; A[QCPBars::getValueRange] --> B[QCPBars::getBaseValue]; B --> B;
```

The diagram illustrates a sequence of operations. It begins with a rectangular box on the left containing the text 'QCPBars::getValueRange'. A straight blue arrow points from the right side of this box to the left side of a second rectangular box on the right, which contains the text 'QCPBars::getBaseValue'. Above the second box, a curved blue arrow starts from its top edge and points back down to the same box, indicating a self-call or a loop.

QCPBars::getBaseValue
