

QCPAxis::visibleTickBounds

```
graph RL; A[QCPAxis::calculateMargin] --> B[QCPAxis::visibleTickBounds]; C[QCPAxis::setupTickVectors] --> B;
```

A diagram illustrating the relationship between two functions and a variable. On the left is a gray rectangular box containing the text 'QCPAxis::visibleTickBounds'. To its right are two white rectangular boxes, one above the other. The top box contains 'QCPAxis::calculateMargin' and the bottom box contains 'QCPAxis::setupTickVectors'. A blue arrow points from the right side of the top box to the right side of the gray box. Another blue arrow points from the right side of the bottom box to the right side of the gray box.

QCPAxis::calculateMargin

QCPAxis::setupTickVectors
