

QCPAbstractItem::hasAnchor

```
graph RL; A[QCPAbstractItem::createAnchor] --> C[QCPAbstractItem::hasAnchor]; B[QCPAbstractItem::createPosition] --> C;
```

The diagram illustrates a relationship between three methods of the QCPAbstractItem class. On the left is a gray-shaded box labeled 'QCPAbstractItem::hasAnchor'. To its right are two white boxes: 'QCPAbstractItem::createAnchor' at the top and 'QCPAbstractItem::createPosition' at the bottom. Two blue arrows point from the right side of each white box to the right side of the gray box, indicating that both 'createAnchor' and 'createPosition' methods call or utilize the 'hasAnchor' method.

QCPAbstractItem::createAnchor

QCPAbstractItem::createPosition
