

QCPItemText::setFont

```
graph LR; A[QCPItemText::setFont] --> B[QCPItemText::font]
```

A diagram showing a relationship between two Qt widget methods. On the left, a gray rectangular box contains the text 'QCPItemText::setFont'. A blue arrow points from the right side of this box to the right side of another rectangular box on the right. This second box is white and contains the text 'QCPItemText::font'.

QCPItemText::font
