

unsigned

```
classDiagram
    class Unsigned {
        unsigned
    }
    class PORTABITS {
        PORTABITS
    }
    Unsigned --> PORTABITS : +RA0, +RA1, +RA2, +RA3, +RA4
```

The diagram shows two classes. The top class is an 'unsigned' integer, represented by a rectangle with three horizontal compartments; the top compartment contains the text 'unsigned'. The bottom class is 'PORTABITS', represented by a shaded rectangle with three horizontal compartments; the top compartment contains the text 'PORTABITS'. A vertical line connects the bottom of the 'unsigned' class to the top of the 'PORTABITS' class, ending in a diamond-shaped association symbol. To the right of this line, five labels are listed vertically: '+RA0', '+RA1', '+RA2', '+RA3', and '+RA4'.

+RA0
